

### KEY FEATURES

- Green topped
- Excellent uniformity
- Mild flavour

# SKERNE

**Description:** From the Elsoms breeding program, Skerne is a green topped, globe shaped swede. Its unique colour makes it a great alternative to standard purple varieties. Yields high percentage of 600g - 800g roots.

**Performance:** Scores assigned from Elsoms' own trials.

■ Skerne ■ Control variety

\*Days to maturity figures shown relate to optimum maturity and do not relate to possible extension of harvest period by storage. \*\*1 to 10 (1=very low/poor 10=very high/good).

All data relates to UK trials.

### Cropping guide

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

■ Sowing period ■ Harvest

**Growing:** Best results achieved when grown under nets for cabbage root fly control. Suitable for heavy soils. Slow growing production with nutrition and liquid feeds (sulphur) used regularly. Fungicide programme used to maintain healthy tops.
