

KEY FEATURES

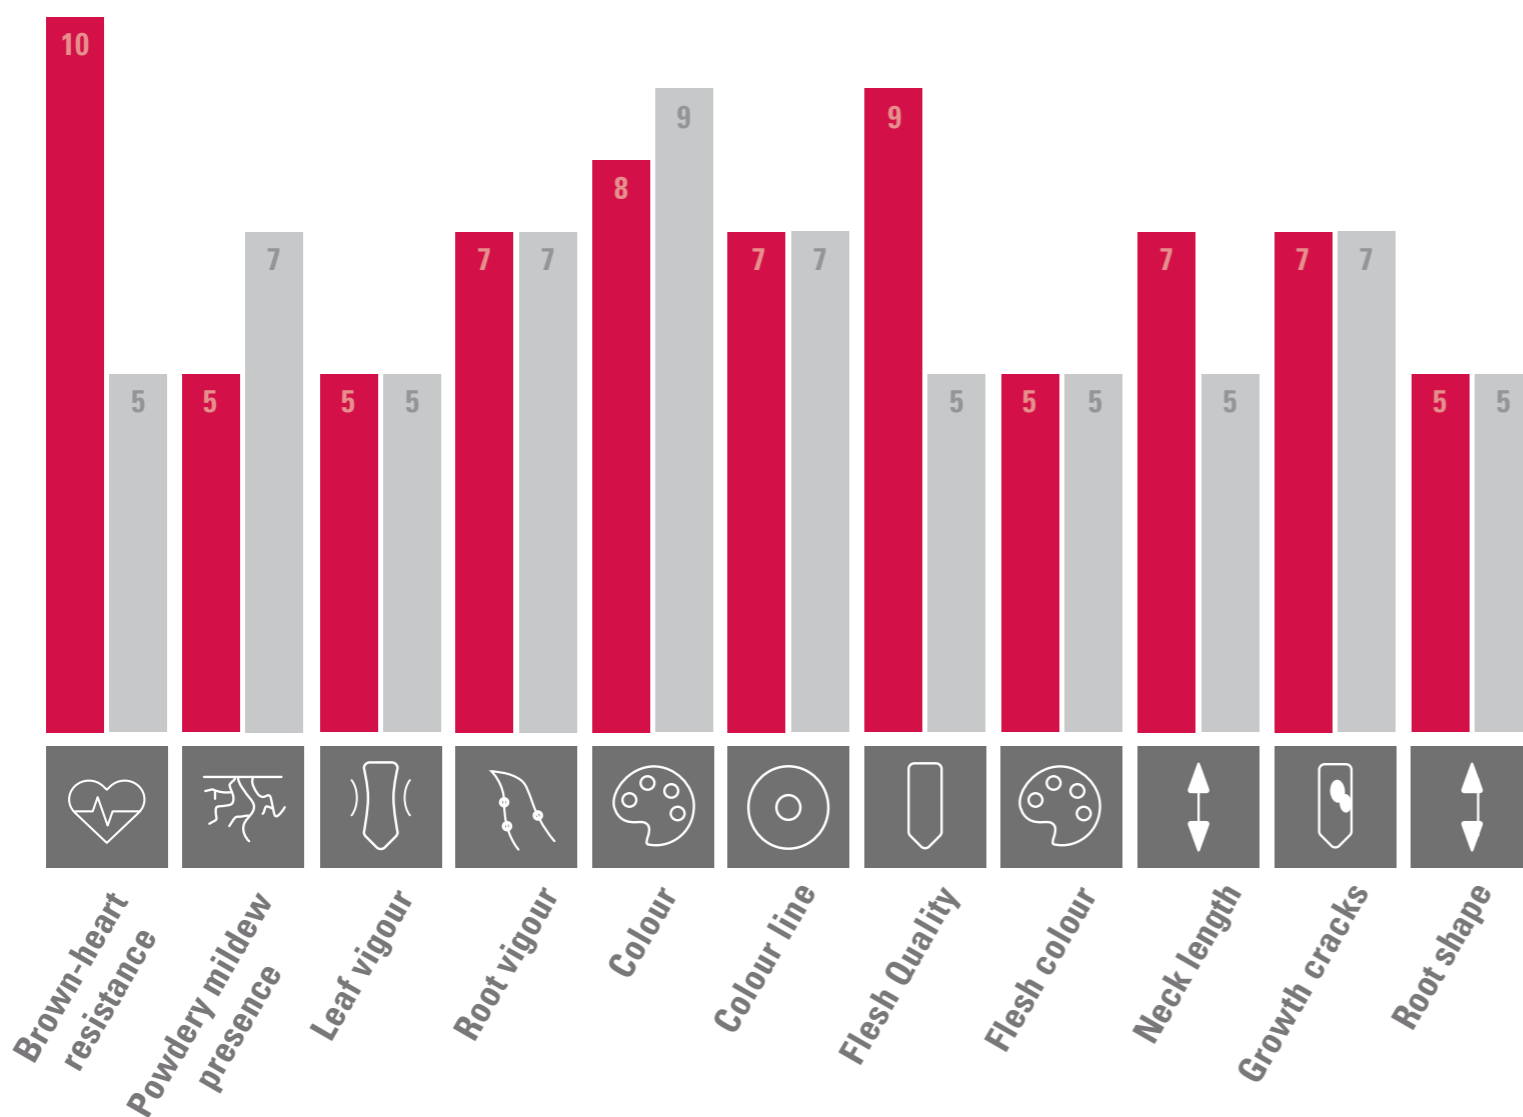

- **Brown Heart resistance**
- **Suitable for processing and retail**
- **Highest yielding UK variety**

TEVIOT

Description: Swede variety from the Elsoms breeding program with a focus on Brown Heart resistance. Teviot provides a strong deep purple colour, excellent shape and good foliage. UK trials have shown no sign of Brown Heart over the course of four years. Teviot has a wide end market as it can be used for both culinary and processing purposes.

Performance: Scores assigned from Elsoms' own trials.

■ Teviot ■ Control variety

Growing: Best results achieved when grown under nets for Cabbage Root Fly control. Suitable for heavy soils. Teviot's uniform sizing help to achieve a better rate of growth - generating higher yield. Slow growing production with nutrition and liquid feeds (sulphur) used regularly. Fungicide programme used to maintain healthy tops. Yields up to 40 ton per acre in UK trials. Highest yielding UK variety.

All data relates to UK trials.

Profile:

	Days to maturity	100
	Colour	8
	Shape	8
	Brown Heart resistance	10
	Foliage quality	8

*Days to maturity figures shown relate to optimum maturity and do not relate to possible extension of harvest period by storage. **1 to 10 (1=very low/poor 10=very high/good).
